No controller support. No possibility to change the key mapping. Unplayable. Do not buy. Not even for 49 cents.. Side scroller shooter that seems alright if that's your sort of thing. No technical issues, just not my kind of game.. Just not a fun game at all. Heroes enter your dungeon and you try to lure them to look at statues and enter your rooms so they become happy then you slay them collecting soul energy to make more statues and rooms . the game just sucks sry ... An Instant Childhood Point-and-Click Classic from the Days of my Childhood, which consist of the old MS-DOS, Windows 3.1, Windows 95, Windows 98 & Windows 98SE PCs. Another Personal Favorite game of mine in which you help Putt-Putt get ready for the Cartown 500 Big Race by finding by finding Extra High Powered High Octane Gasoline, a Safety Helmet for Pep, a Triangular Racing Flag with the Racing Number on it & Earning Money for a Carwash/New Paint Job/Super Speed Radial Racing Tires.

And Remember: It's not if you Win or Lose, it's how you race around the Track.. i rekon this game would be good IF MORE PEOPLE PLAYED IT!!. kool game so far even with dated graphics i love the different perspective the mage gives you im surprised more games haven't tried this.. Just completed this game on my channel (playlist below). I had a good time! It was adequately spooky with some good looking enemies alone the way. The audio was my favorite aspect of this game as it made moments tense even when nothing was there. It left lots of questions unanswered, but I assume Chapter Two will clear things up.

 So far a good start to the series.

This is really good pack, i think I like these skins the most out of the past ones with the exception of zhen ji(dw4 has better melon physics for some reason)

I just wish they had the fury textures from the strikeforce games.. Niplheim's It's a funny game. It's some time since I played an eroge as fun as this one. (I hope the next games of this developer are so funny as it). Disco Necropolis!!!!. notting works dont waste your time. If you think the Polish T34s are outdated, the Swedes have infantry with bolt action rifles from the 1800s.
